Sustainability & Science:

After School Experience at the Museum of Science

Solving Social, Economic & Environmental Problems Through Green Chemistry and Sustainability

What: Middle School students learn about sustainable science through hands-on and interactive activities featuring Beyond Benign Green Chemistry Outreach Fellows and Dow Sustainability Innovation Student Challenge winners. Hands-on activities include making solar energy devices using blackberries, playing biomimicry matching games, and creating bio-based glue.

When & Where:

- Thursday, October 21st
- 3 - 5 PM
- Museum of Science, Boston
- Blue Wing
- Grades 5 - 8

Cost: FREE to registered groups
